The Study Club will continue after this 4 part series. Some meetings will be live and onsite, some will be webinar format, some will be online, and there will be some workshops. Most events will be recorded for playback later on the study club's website for members of Dr. Bohannan's study club who cannot make the events.

Topics planned:

1. Update on bisphosphonates and current treatment protocols
2. Pathology for the general practitioner.
 3. Office emergencies
4. OSHA training for offices and staff
 5. Use of TAD's in dentistry
 6. Soft tissue management
7. Options in the edentulous patient
